

Other specific finishes such as mirror polishing available on request. We also offer powder coating in a large range of stock colours, as well as shotblasting, galvanising and other final finish options.

Part Finish Standards		Mild Steel	Stainless Steel	Aluminium
0 - No Finish/As Cut Parts for further processing or fabrication Standard finish for laser cut parts	<i>Parts supplied as cut, no surface finishing. Minor surface scratches permitted, any heavy dross will be removed.</i> <i>A small burr will be present on all materials and thicknesses, apart from mild steel over 3mm.</i>			
1 - Clean/Deburred Semi-finished parts suitable for coating or use as is	<i>Edges slightly broken and any dross/burr removed, usually back side only. Surfaces finished to remove any large imperfections where required, surface finish may not be 100% consistent or have all scale removed if present.</i>			
2 - Fully Finished Parts with consistent surface finish, suitable for use as is or for coating/further finishing	<i>Any dross removed, fully deburred and edges broken. Consistent finish on all surfaces, which may be random sanded, finished or tumbled. Folded parts will have die marks present.</i>			
3 - Brushed Finish Cosmetic brushed display finish for stainless steel or aluminium only	<i>Fully deburred with consistent brushed finish on both surfaces.</i>	N/A
